TO OUR FRIENDS AND PATRONS

TO THE LOVER OF FLOWERS, there is no class of plants so much prized as those which are produced from bulbs. The reason is easily found, because within the bulbs are stored all the future glory of leaves and flowers, only requiring the simplest culture to develop them in their highest perfection. Success is therefore the rule, and to the many amateurs who year after year give much of their time and attention to the cultivation of various plants with little success, our advice is, TRY SOME BULBS. Another reason why bulbs are prized so highly is that a large number of them produce their flowers in very early Spring, when the rest of Nature is asleep. Then it is that a clump of Snowdrops, Scillas, or Chionodoxas impart to the garden an air of warmth and cheer that cannot be accomplished in any other way Following these modest flowers come the showier Crocus, Narcissus, Hyacinths, Tulips, Iris, etc., in all their dazzling colors. keeping up a continuous display well into the Summer. With no other material can be secured such a wealth of charming flowers of infinite variety of form and coloring, with so little trouble and at so small an outlay of money. **We believe our prices are correspondingly lower than any other firm in the country, and we know that our bulbs are unsurpassed for their blooming qualities.**

TIME OF PLANTING.—To the beginner, and to some of the more experienced, we would particularly emphasize the fact that FALL, and NOT SPRING-TIME, is the time to plant all kinds of Spring-flowering bulbs. The large part of the bulbs offered in this catalogue reach us from Holland, in September, and the sooner they are planted after that the greater will be the measure of success; therefore, ORDER EARLY.

The Beautiful Persian Iris,

Bearing Orchid-like Flowers.
Of Very Dwarf Habit.

One of the Most Charming Flower Bulbs from Holland.

WE BRING prominently before flower planters these gorgeous Iris. While comparatively little known in this country, they are immensely popular in England, where they were originally introduced from Persia. The bulbs possess a vigorous vitality that makes them valuable for home culture in Winter, where they require the simplest culture, and succeed whether planted in pots or in water in glasses. As will be seen by our illustration, the plants grow dwarf and compact, with remarkable flowers, curiously constructed and quaintly marked, ranging in size from two to three inches across. The ground color is azure blue, exquisitely tinted with lilac, while the fall is is solidly marked with bright yellow and purplish black. Looking at them one is instantly reminded of rare orchids. While no flowering bulb can be more desirable to grow indoors in pots, this grand variety, being entirely hardy, is also suitable for planting in the open ground, where it is "one of the first flowers in Spring," coming into bloom before the Crocus is gone.

All in all it is so easy to grow, and so surprisingly rich and handsome, that when well known we predict the greatest popularity for it.

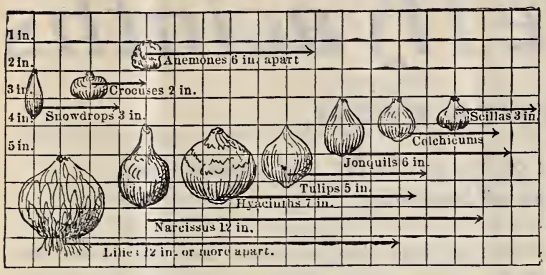
A Diagram Showing the Distance and Depth to Plant the Different Varieties of Bulbs.



HYACINTHS.

THE HYACINTH has been a popular flower for centuries, and no flower among all those that help to make the garden bright is deserving of greater popularity, all things considered. It has the merit of being beautiful and easy of cultivation—qualities which commend it to the amateur strongly. It blooms early in the season, remains a long time in flower, ranges through so many shades of rich and delicate colors that all tastes can be suited in this direction; they have a delightful fragrance which is sufficient in itself to make it a general favorite. It is without doubt the best of our hardy Spring bulbs for general use.

"JUST THE WAY TO GROW HYACINTHS."

CULTURE IN POTS—The best soil to use is composed of good fibrous loam with a liberal addition of leaf soil, sharp sand and well decayed cow manure. The whole should be well mixed and left to stand some time before use. In potting leave the top of the bulb exposed, and let the soil be moderately moist. The pots should then at once be placed outdoors on a bed of wet ashes and covered with 6 inches of the same material or good garden soil and left exposed to the weather. When the bulbs are well rooted and about an inch of the top growth has been made, they may be removed indoors to force, first into a subdued light until the blanched foliage has attained its full green color, and then into the sunniest situation at command. Abundance of air, a moderately moist atmosphere and plenty of water at the roots is then necessary for early, well developed flower spikes. A dry or frosty atmosphere or a draughty situation will cause the flower buds to shrivel. Forcing should only be done gently, the temperature like that of a cool greenhouse, a sitting room window or frame, always selecting the sunniest and most genial situation.

CULTURE IN GLASSES—Pure clear water should be used, with a piece or two of charcoal in it to keep the water sweet. The base of bulb should at all times just touch the water. Place the glass in a cool dark place to encourage root growth. When the glasses are nearly full of roots admit them to the light gradually, and then to the sunniest place at command till the flower spikes are well developed. Avoid a too dry or frosty atmosphere or a draughty situation, as such conditions will often cause the flower buds to shrivel.

CULTURE IN BEDS AND BORDERS—For its successful cultivation in open air, the Hyacinth likes a light, rich soil, which should be dug to a depth of 18 inches previous to planting the bulbs, the addition of sharp sand being recommended if the soil is very heavy. The ground should also be effectually drained. After digging the ground well, remove the top soil to a depth of 4 inches, and set the bulbs at equal distances of 6 to 8 inches, then cover them with the soil which had been removed and press and level the same with board or plank. From the time of their appearing above ground in Spring they require little or no attention, but a slight covering of small litter or straw may be used with advantage in very exposed situations in severe weather. The planting of the bulbs should be done in October and November.

ROMAN HYACINTHS.

We wish to call special attention to these beautiful Roman Hyacinths, which are so valuable for early Winter blooming. They are among the few flowers which can be had as early as Christmas and New Years. Each bulb throws up several spikes of flowers, very beautiful and fragrant, and when kept in a cool room will keep perfect for weeks. Three can be planted in a 4 or 5 inch pot, and will soon be in flower. In the garden they are first of all Hyacinths to bloom. We offer extra large bulbs. Do not fail to plant a good lot of them for Winter.

SINGLE WHITE—Waxy-white bells of great beauty and fragrance. **Price, large bulbs, 5 cts. each; 6 for 25 cts., 12 for 50 cts.**

SINGLE BLUE—Lovely light blue, a fine contrast to the white variety. **Price, 5 cts, each; 6 for 25 cts., 12 for 50 cts.**

SINGLE PINK—A grand new sort with enormous bright pink bells in large spikes. **5c. each; 6 for 25c; 15 for 50 cts.**

CANARY YELLOW, New—Few novelties will surpass this new Yellow Roman Hyacinth. There is nothing to be said of it except it is like the common Roman white, except in color, which is a lovely shade of light yellow. **Price, 10c. each; 3 for 25 cts.**

SPECIAL OFFER—For 20c. we will send one bulb of each of these four Roman Hyacinths; three of each, 12 in all, for 50 cents.

THE GRAPE HYACINTH,

IMPROVED.

This charming little gem should be found in every garden in abundance. It has been termed the "Blue Lily of the Valley," and when planted in a mass with that sweet flower it does resemble it to some extent, and forms a most fascinating combination. It grows about the same height and blooms about the same time each Spring. It increases rapidly and when once planted a mass of beautiful blossoms, which will increase each year, is insured for a lifetime. But for Winter blooming in pots it is of the greatest value. Plant five or six bulbs in a five inch pot, and you will have as lovely a pot of blooms as you can imagine. Words fail to do it justice. Flower stems grow a foot in height, bearing a dense spike of sky-blue bells tipped with white, and oh! so lovely. Please remember that ours is an improved strain of Grape Hyacinth, much superior to the old form.

IMPROVED BLUE—Price, 3 for 5 cents; 12 for 15 cents.

SNOW WHITE—New and scarce. Price 2c each; 6 for 10c.

FEATHER OR COCKADE HYACINTH.

Of this elegant Hyacinth the spike of bloom resembles a feathery plume, and is a fine blue color. The bloom first appears as a tassel about an inch or two long, of a rich blue color, but as it expands is marked with pink, and at the end of two months is developed into a beautiful plume from six to ten inches in length, of exquisite coloring—pink, violet and blue. Desirable for both house and garden. The bulbs rapidly increase and are perfectly hardy. We have secured a fine supply for this season.

Price, 3 cents each; six for 15 cents, twelve for 25 cents.

TULIPS

Are such universal favorites that it is scarcely necessary to expatiate upon their merits here. Their ease of culture, combined with beauty of form and gorgeous coloring, render them the most popular bulbs grown for Spring bedding; and for Winter flowering in the greenhouse and window-garden they are incomparable. The Tulip is extremely hardy and of easy culture, flowering as freely in the shade as in the sunshine, and producing as fine flowers in a confined town garden as in a more favored place. Double and Single Tulips when associated together and in front of shrubs, maintain a longer display than if either are separately planted. In gardens where the flower beds must be kept gay from the earliest day of Spring, plant between the lines of Tulips, Scilla Siberica Chionodoxa Luciliæ, Snowdrops or Crocus, and as these flower first they can be removed or cut down when the Tulip is coming into bloom. The Single Tulip has a greater variety of rich, delicate and attractive colors than any other section of Spring flowering bulbs. Those only who have massed the different varieties, planting the bulbs four inches apart can form any idea of their beauty and their great diversity in shade and color, and the grand effect they produce grouped in flower beds or borders.

THE CHINESE SACRED LILY.

The "Shui Sin Far," or Water Fairy Flower, Joss Flower, Flower of the Gods, etc., as it is called by the Celestials, is a variety of Narcissus bearing in lavish profusion chaste flowers in silvery white, with golden-yellow cups. They are of exquisite beauty and entrancing perfume. It is grown by the Chinese according to their ancient custom, to herald the advent of their new year, and as a symbol of good luck. The bulbs are grown by a method known only to themselves, whereby they attain great size and vitality, insuring luxuriant growth and immense spikes of flowers. In fact, the incredibly short time required to bring the bulbs into bloom (four to six weeks after planting) is one of the wonders of nature. "You can almost see them grow," successfully almost everywhere and with everybody. They do well in pots of earth, but are novel and beautiful grown in shallow bowls of water, with enough fancy pebbles to prevent them from toppling over when in bloom. A dozen bulbs started at intervals will give a succession of flowers throughout the Winter. See cut. We are importing direct from China immense bulbs of the true large flowering variety. **Price, 15 cents each; 5 for 50 cents.** A dozen bulbs planted one a week will give a supply of flowers all Winter.

They are also quite hardy, and can be planted in the open ground, where they will bloom elegantly in the early Spring. We earnestly advise all lovers of flowers to plant this beautiful gem. It is sure to delight you. It is of the easist culture and always sure to thrive. **Price, fine bulbs, 4 cents each; 3 for 10 cents; 12 for 35 cents.**

This variety bears from 6 to 12 yellow or cream-colored flowers on stems 12 to 18 inches high. Bulbs should be planted soon after being received as they suffer if allowed to remain dry. **Price, 5 cents each; 3 for 10 cents; 30 cents per dozen.**

BERLIN MAMMOTH LILY OF THE VALLEY

BERLIN MAMMOTH LILY OF THE VALLEY.

No flower is more tenderly loved than this. Its graceful waxen bells are filled to overflowing with the most delicious perfume, and, set among its own glossy green leaves, it is indeed the gem of the garden. It succeeds in the open ground in almost any situation, but prefers a somewhat moist location A top dressing of well rotted manure or rich soil in the Autumn will be found a great benefit. For house culture they are invaluable and easily managed. Place rather thickly in pots or boxes, scattering a light soil or turfy loam among the roots, but not over the tops, then cover with moss or some such substance, and place outdoors until a sharp frost, when they should be brought indoors and given plenty of heat and considerable moisture. Take care to keep them shaded from the hot sun with cloth until the stems are two or three inches high, when the shading should be removed to develope the flower. They make a charming sight, when grown in large patches, in partially shaded localities around the lawn, near the borders of streams, lakes, springs, etc.

PRICE—for the Berlin Mammoth, Large Flowering Lily of the Valley, 5 cents each, 3 for 10 cents, 12 for 35 cents. Ready in November for shipment.

The Persian Ranunculus are a little smaller than the French, and also more dwarf. However, their colors are as fine and exhibit the most beautiful shades, and are of the most graceful form. The Turban, or Turkish Ranunculus differ very much from each other, and display lovely oriental beauty of coloring. Can be grown easily in pots or out of doors if protected.

Iris Susiana.

If every lover of flowers could see this grand plant in bloom, we really believe not one in one hundred would refuse to pay one dollar each for one or more bulbs of it. Among all flowers there is hardly one of such oddity and striking beauty. The bloom is of enormous size, and in describing it we say "it is chocolate black mottled, beautifully veined with grayish white," yet from this no one can form a correct idea of how the plant looks. It is indescribable, and the planter will be surprised when he sees it. It is perfectly hardy, and blooms in May. In July the foliage dies down, and the bulbs lie dormant until late Fall or the next Spring. Try it, and when it blooms you will undoubtedly pronounce it the most beautiful flower in your garden. The sorts we offer are especially strong and fine. **Price, 10 cents per dozen, by mail; 60 cents per 100; by express, 50 cents per 100, at purchaser's expense.**

Ornithogalum

Arabicum.

The Star of Bethlehem.

WE INTRODUCE this as a new Winter blooming bulb of great beauty and value. In magnificence there is nothing like it among the Winter blooming bulbs or plants. Even the grand Hyacinth must be preceded by the stately beauty of this flower. It is a native of Arabia. The bulb is large and solid, closely resembling that of a Hyacinth, and requiring exactly the same culture. Leaves long and narrow. The flower spikes are eighteen to twenty-four inches high, strong and graceful, bearing an immense cluster of large pearly-white flowers, having a jet black center. The individual flowers keep many weeks before fading, so that for more than a month this grand spike of bloom is in full glory. Its durability is almost without an equal among flowers. Add to this its delicate aromatic fragrance, and we have a Winter-bloomer almost without a rival. Its culture is the easiest, as it will grow in any position in any window. A bulb can be planted in a four-inch pot or several in a larger pot or box. Pot in September, October or November. They can even be kept and planted as late as February first. For open ground culture they do well if kept from freezing severely.

Price, 5 cents each; 6 for 25 cents.

FREESIA REFRACTA ALBA

Freesia Refracta Alba.

No description can do adequate justice to this beautiful plant. The flowers are two inches long and about the same in width, shaped like miniature Gladioli, and borne in clusters of six to ten on depressed horizontal scapes. The body of the flower is pure white, with lower segments spotted lemon-yellow. The perfume is delicious, being a mixture of Mignonette, Violet, and Jasmine, and one plant is sufficient to perfume a large room, without the overbearing perfume of Hyacinths and Tuberoses. The plant has tooth shaped bulbs and flat-spreading leaves. Its cultivation is of the simplest character, requiring only to be potted early in September or October, to be watered sparingly at first, then placed in a sunny window and watered more as growth progresses. When out of flower, store in some cool place and repot at proper season in fresh soil for another year's growth. (See cut.) **Price, 2 for 5 cts; 5 fine bulbs for 10 cts; 12 for 20 cts. Mammoth bulbs, 5 cts. each; 12 for 40 cts.**

THE BEST LILIES FOR PLANTING

THE EASTER LILY

"The fairest of all things that blossom and grow,
Sweet as the Summer and pure as the snow,
Is the Lily that tells,
Like the glad Easter Bells,
Once more the sweet story which all hearts should know."

The True Bermuda Easter Lily, Lilium Harrisii.

This peerless Lily is the greatest acquisition to floriculture in many years. Their profusion of bloom, the remarkably short time required to bring them into flower, and the certainty to produce abundant bloom, and also the ease with which they can be manipulated to be flowered at any desired period, such as Christmas, Easter and other special occasions, render them invaluable. The flowers are delightfully fragrant, pure waxy-white, of great substance, and if cut as soon as they are open, or partially open, they can be kept for two weeks. A short time only is required to bring them into bloom. Bulbs potted in August can be had in flower in November if desired. A succession of bloom can be kept up from November to May by bringing the pots of rooted bulbs in from cold frames at intervals throughout the Winter. The quantity of bloom produced is marvelous, the average production of bulbs five to seven inches in circumference, even when forced, is from five to eight flowers, and of bulbs seven to nine inches, eight to twelve flowers; and if desired a second crop of flowers, frequently equal to the first, can be secured the same season by drying the plants off after blooming for a time and then again starting them. Blooming plants in pots form typical Easter offerings and presents, for decoration of the window, table, house and church, nothing is more appropriately beautiful and highly appreciated. Thousands upon thousands are sold in the large cities every Winter for this purpose. As a garden Lily it is of great beauty, being entirely hardy excepting in Northern climates, where it requires a protection of leaves or litter to a depth of five or six inches. (See cut.)

Price, for large bulbs, 15 cents each; 4 for 50 cents; 10 for $1.00.

BEAUTIFUL AND FRAGRANT WINTER-BLOOMING CARNATIONS.

Next to Roses, we place Carnations as being the prettiest and sweetest flowers grown. They are especially adapted for Winter flowers. A customer writes: "Our better half had a plant of both red and White Carnations in the house last Winter, placed there in the Fall before they commenced blooming. They grew beautifully, and about the first of December commenced blooming. From that until May they were in flower continuously. At times as many as fifty blooms could be seen on them at once, and they completely filled the house with their fragrance."

FUCHSIA SPECIOSA.

The Grandest of All Winter Bloomers.

THIS is really one of the most charming and desirable Fuchsias in cultivation, and should be better known. It is a genuine Winter bloomer, and all who know it, value it very highly for this quality. The habit of the plant is erect and compact, presenting a decidedly neat and attractive appearance as a pot plant. The fine star-shaped flowers are produced in profusion, and begin when the plants are quite young; indeed, the plants in our houses in all stages are rarely seen without flowers. The flowers are four inches or more in length; tube and sepals bright rose; corolla brilliant carmine. It blooms quite freely, plants in two-inch pots frequently producing flowers; but large, well established plants will bloom more freely and produce large clusters. It is of the easiest culture, requiring the same treatment as other Fuchsias. No plant will attract more attention than a well-grown specimen of Fuchsia Speciosa. Its clusters of long, drooping, tube-like, brilliant flowers, and very large, green foliage, give it a most striking and beautiful appearance. **Price, 10 cents each; 3 for 25 cents.**

It is a genuine Winter bloomer, and all who know it value it very highly for this quality. The habit of the plant is erect and compact, presenting a decidedly neat and attractive appearance as a pot plant. The fine, star-shaped flowers are produced in profusion, and begin when the plants are quite young. Indeed, the plants in our houses at all stages are rarely seen without flowers. The tubes and sepals are light sky-blue. It blooms quite freely, plants in two-inch pots frequently producing flowers; but large, well established plants will bloom more freely and produce larger clusters. We have seen a plant of this Fuchsia six feet high and five feet through, and by actual count it was loaded with over five thousand of its bright blooms. It was an object of beauty not soon forgotten. It is of the easiest culture, requiring the same treatment as other Fuchsias. No plant will attract more attention than a well grown specimen of Fuchsia Black Prince. Its clusters of long, drooping, tube-like, brilliant flowers, and very large, green foliage, gives it a most striking and beautiful appearance. **Price, 10 cents each; 3 for 25 cents.**

Sweet Scented Violets

RICH in modest beauty, famous for its enchanting fragrance, and truly "the sweetest flower that grows." The Violet always blooms until covered by the first snows of Winter, and with the last cold blast still about it, this gentle flower shyly appears from out its icy bed, heralding the coming of Spring. Sturdily it grows and sweetly it blooms, and all the world loves it. Violets are perfectly hardy, and when planted outdoors a shady situation should be selected; a light covering of leaves or litter will prove very beneficial. For Winter blooming indoors keep in a cool situation and water freely. By observing these simple instructions you can have a bountiful profusion of these fragrant and dainty little flowers.

SPECIAL OFFER—For 60 cents we will send you, postpaid, the set of 8 Violets. This is a great bargain; don't let it pass.

MARIE LOUISE—To contrast with white, we offer this double deep bluish purple, sweet-scented variety, recently introduced. Desirable for pots or gardens. Plants hardy and bloom freely. **Price, 10 cents each.**

TYPE OF NEW GIANT SINGLE FLOWERING VIOLET

FARQUHAR—A beautiful new, double Violet, strong and healthy grower, perfectly hardy, and free flowering, producing in the greatest abundance lovely deep and double flowers of delicious fragrance, borne on long stems, the flowers of splendid size, nearly as large as California. **Price, 15 cents each; 2 for 25 cents.**

LADY HUME CAMPBELL, the new Ever-Blooming Violet—This grand new Violet is a true perpetual bloomer and enormously productive; the flowers are very large, often the size of a half dollar, perfectly double, like little Roses; very fragrant and of the most lovely azure blue color. **Price, 10 cents each.**

HARDY DOUBLE ENGLISH VIOLET—This violet is entirely hardy, perfectly double, a deep violet purple color, deliciously fragrant. Surpasses the well known Marie Louise in richness of color. **Price, 10c. each.**

SWANLEY WHITE OR QUEEN OF FRAGRANCE—This beautiful new double White Violet is unquestionably the finest double Violet in existence, and is a decided acquisition to even the smallest collection of plants. **Price, 10 cents each.**

LUXONNE, New—Of the same size as the California, but appears nearly double in size, as the petals all open out flat; it appears like a big blue Pansy bloom, and has the advantage of flowering continuously from early in September until April. It is a beautiful rich but soft violet, perfect color, with strong, stout stems, and very fragrant. **Price, 10 cents each.**

NEW FRENCH VIOLET, PRINCESS OF WALES—It is recommended by the introducers as the best Violet in existence. It is of hardy, vigorous growth, and wonderfully free-blooming; stems 10 to 12 inches long. Large, healthy and heavy foliage; grand single flowers; true blue color, symmetrical form, nearly as large a Pansy blossom and delicately fragrant. **Price, 15 cents each; 2 for 25 cents.**

THE CALIFORNIA—Grand new variety. It is a sturdy grower, with dense, heavy foliage, entirely free from disease. Flowers single, intensely fragrant. Color, a clear violet purple that does not fade. The flowers are as large as a silver dollar, are borne on stems ten to twelve inches long. **Price, 10 cents each.**

THE BOSTON SWORD FERN.

NEPHROLEPSIS EXALTATA BOSTONIENSIS. (SEE CUT.)

A variation from the Sword Fern, which originated in the vicinity of Boston, where it has been in popular favor for a number of years under the name of Boston Fern. In the vicinity of Boston no other plant is used so extensively as this graceful Nephrolepsis, which differs from the ordinary Fern in having much longer fronds, which frequently attain a length of four feet. These fronds arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern. This drooping habit makes it an excellent plant to grow as a single specimen on a table or pedestal. **Price, 25 cents each; strong plants 50 cents each. Extra large specimen plants, $1.00 each.**

THE COMMON SWORD FERN.

NEPHROLEPSIS EXALTATA.

In well grown specimens the fronds attain a length of six or seven feet, but only one to three inches wide, and like plumes arching over in every direction in a most graceful manner. This beautiful Fern is excellent for outside planting in shady borders. It is a very fine plant for hanging pots or baskets on the piazza in Summer, and conservatory or window in Winter. **Price, strong plants, 15 and 25 cents each; large plants, 50 cents each.**

MINIATURE, DWARF SWORD FERN.

NEPHROLEPSIS PHILLIPENSE.

A very pretty narrow-leaved variety, with dark green foliage, magnificent to fill in wire hanging baskets. **Price, 15 cents each.**
